

Jing-Zhang Urban Capability Exchange | Structure & Evidence

City OS / Capability Backbone / Public Value

CITY OS CORE LOOP

- 01 Urban problem
- 02 Eligibility gate
- 03 Risk authorization
- 04 Reversible test
- 05 Public-value review
- 06 STOP / MODIFY / CONTINUE / SCALE
- 07 Capability exchange
- 08 Version release / retirement

PROVISIONAL CONSTRAINT — NOT OFFICIAL REDLINE
All crossings, hosts and statutory controls require verification

Land-use Structure | From Stripes to a Capability Mosaic

Conceptual land-use — not statutory zoning

- 05 商业 / Market & service
- 0702 社区服务 / Community service
- 0803 文化 / Culture-memory
- 1401 公园绿地 / Park-green
- 0701 居住 / Living
- 0804 教育 / Education
- 0802 科研 / Research
- 16 留白 / Reversible reserve

Implementation layers

- Permanent: ordinary walking / shade / accessibility / safety
- Adaptive: replaceable signs / furniture / interfaces
- Experimental: bounded test / bypass / human stop / removal

Three Key Areas — Differentiated Detailed Design

Verification Campus

Learning Neighborhood

Market & Service Commons

Technology production + higher-risk validation

Social learning + public service

Market + AI-native service validation

- Ordinary city first

- Staffed/non-AI parity

- Mixed commuters/merchants/couriers/residents

- Tests include bypass

- Personalization requires consent

- Validate in daily life

- STOP/removal designed in

- Vulnerable outcomes separate

- Not a closed tech park

Public Capability Interface | City First, AI Backstage

Neighborhood Service

Heat Refuge

Market Service

Validation Interface

Mobility × Blue-Green × PCI | Continuity Is Not “Draw a Road”

Spatial principles

- North–south: public-life continuity backbone
- East–west: 5 evidence-gated stitch relations
- Blue-green: shade/thermal/stormwater first
- Nodes call capabilities; ordinary city works first
- Unverified crossings remain relationships, not invented structures

Landmark as Memory | 1909 → 2026 → Future → Retired

Landmarks record learning, including stopping and retirement. Railway DNA appears as tracks, switches, stations and mileposts - not nostalgic decoration.

Urban Adaptation Rate | Learning Is Not Deployment Counting

UAR = verified improved eligible issues / evaluable qualified issues

Responsible STOP = learning/safety outcome, not automatic adaptation credit

Public Dashboard

UAR	Unknown
Null until real operation	
STOP rate	Unknown
Publish stops, not hide failures	
Override	Unknown
Human takeover must be measurable	
Transfer	Unknown
Revalidate before transfer credit	
Non-AI parity	Unknown
Usable when AI declined/offline	

Jing-Zhang City Version Release | Accountability, Not a Leaderboard

Illustrative structure only — no live operating counts are claimed.

Problem + baseline
Authorization + experiment record
Public-value outcomes
Complaints / override / incidents
Transfer + revalidation
Retirement + data disposition
Next-year unresolved problems

What Remains After 20 Years? | Persistent Protocol, Disposable Technology

Designed to be replaced

Models
Cloud stacks
Sensors
Robots
Vendors
Interfaces

5y / 10y / 20y

Must persist

Public accountability
Risk authorization
Data provenance/evidence
