PROVISIONAL CONSTRAINT — NOT OFFICIAL REDLINE
All crossings, hosts and statutory controls require verification

Evidence & Overall Structure

PROVISIONAL CONSTRAINT — NOT OFFICIAL REDLINE

Jing-Zhang Urban Capability Exchange | Structure & Evidence

City OS / Capability Backbone / Public Value

Land-use Structure | From Stripes to a Capability Mosaic

Three Key Areas

Verification Campus / Learning Neighborhood / Market & Service Commons

Three Key Areas — Differentiated Detailed Design

Verification Campus

Technology production + higher-risk validation

• Ordinary city first

• Tests include bypass

• STOP/removal designed in

Learning Neighborhood

Social learning + public service

• Staffed/non-AI parity

• Personalization requires consent

• Vulnerable outcomes separate

Market & Service Commons

Market + AI-native service validation

• Mixed commuters/merchants/couriers/residents

• Validate in daily life

• Not a closed tech park

Public Space | City First, AI Backstage

Public Capability Interface

Public Capability Interface | City First, AI Backstage

Neighborhood Service

Heat Refuge

Market Service

Validation Interface

Learning Archive

Mobility × Blue-Green × PCI | Continuity Is Not “Draw a Road”

Spatial principles

- North–south: public-life continuity backbone
- East–west: 5 evidence-gated stitch relations
- Blue-green: shade/thermal/stormwater first
- Nodes call capabilities; ordinary city works first
- Unverified crossings remain relationships, not invented structures

Governance & Metrics

UAR / Responsible STOP / Public Stewardship

Urban Adaptation Rate | Learning Is Not Deployment Counting

UAR = verified improved eligible issues / evaluable qualified issues

Responsible STOP = learning/safety outcome, not automatic adaptation credit

Public Dashboard

UAR	Unknown
Null until real operation	
STOP rate	Unknown
Publish stops, not hide failures	
Override	Unknown
Human takeover must be measurable	
Transfer	Unknown
Revalidate before transfer credit	
Non-AI parity	Unknown
Usable when AI declined/offline	

Jing-Zhang City Version Release | Accountability, Not a Leaderboard

Illustrative structure only — no live operating counts are claimed.

Problem + baseline
Authorization + experiment record
Public-value outcomes
Complaints / override / incidents
Transfer + revalidation
Retirement + data disposition
Next-year unresolved problems

1909→2026→Future→Retired

Landmark as Memory

Landmark as Memory | 1909 → 2026 → Future → Retired

Landmarks record learning, including stopping and retirement. Railway DNA appears as tracks, switches, stations and mileposts - not nostalgic decoration.

Long-term Operation & Technology Replacement

Persistent Protocol, Disposable Technology

What Remains After 20 Years? | Persistent Protocol, Disposable Technology
