

Jing-Zhang Urban Capability Exchange | Structure & Evidence

City OS / Capability Backbone / Public Value

Land-use Structure | From Stripes to a Capability Mosaic

Regional Coordination | Exchange Capabilities, Evidence and Protocols - Not Claimed Partnerships

Conceptual regional interface: every transferred capability needs target-context revalidation; no signed partnership, resource or budget commitment is claimed.

Three Key Areas — Differentiated Detailed Design

Public Capability Interface | City First, AI Backstage

Orange devices are replaceable interfaces; shade, seating, staffed service, accessibility, bypasses and civic memory are long-term urban assets.

Five Urban Sections | AI Is Not the Main Character

Permanent city space + Adaptive interface + Experimental layer; exact dimensions are not statutory controls.

Landmark as Memory | 1909 → 2026 → Future → Retired

Landmarks record learning, including stopping and retirement. Railway DNA appears as tracks, switches, stations and mileposts - not nostalgic decoration.

Urban Adaptation Rate | Learning Is Not Deployment Counting

UAR = verified improved eligible issues / evaluable qualified issues

Responsible STOP = learning/safety outcome, not automatic adaptation credit

Public Dashboard

|                                   |         |
|-----------------------------------|---------|
| UAR                               | Unknown |
| Null until real operation         |         |
| STOP rate                         | Unknown |
| Publish stops, not hide failures  |         |
| Override                          | Unknown |
| Human takeover must be measurable |         |
| Transfer                          | Unknown |
| Revalidate before transfer credit |         |
| Non-AI parity                     | Unknown |
| Usable when AI declined/offline   |         |

Jing-Zhang City Version Release | Accountability, Not a Leaderboard

Illustrative structure only — no live operating counts are claimed.

|                                   |
|-----------------------------------|
| Problem + baseline                |
| Authorization + experiment record |
| Public-value outcomes             |
| Complaints / override / incidents |
| Transfer + revalidation           |
| Retirement + data disposition     |
| Next-year unresolved problems     |

What Remains After 20 Years? | Persistent Protocol, Disposable Technology

Designed to be replaced

|              |
|--------------|
| Models       |
| Cloud stacks |
| Sensors      |
| Robots       |
| Vendors      |
| Interfaces   |

5y / 10y / 20y

Must persist

|                                     |
|-------------------------------------|
| Public accountability               |
| Risk authorization                  |
| Data provenance/evidence            |
| Non-AI parity                       |
| Capability ID/version/dependencies  |
| City learning archive               |
| Migration/exit/retirement protocols |

Mobility × Blue-Green × PCI | Continuity Is Not “Draw a Road”

Spatial principles

- North–south: public-life continuity backbone
- East–west: 5 evidence-gated stitch relations
- Blue-green: shade/thermal/stormwater first
- Nodes call capabilities; ordinary city works first
- Unverified crossings remain relationships, not invented structures
