Three Key Areas & Land-use Structure

Verification Campus / Learning Neighborhood / Market & Service Commons

Three Key Areas — Differentiated Detailed Design

Verification Campus

Technology production + higher-risk validation

• Ordinary city first

• Tests include bypass

• STOP/removal designed in

Learning Neighborhood

Social learning + public service

• Staffed/non-AI parity

• Personalization requires consent

• Vulnerable outcomes separate

Market & Service Commons

Market + AI-native service validation

• Mixed commuters/merchants/couriers/residents

• Validate in daily life

• Not a closed tech park

Land-use Structure | From Stripes to a Capability Mosaic

Conceptual land-use — not statutory zoning

- 05 商业 / Market & service
- 0702 社区服务 / Community service
- 0803 文化 / Culture-memory
- 1401 公园绿地 / Park-green
- 0701 居住 / Living
- 0804 教育 / Education
- 0802 科研 / Research
- 16 留白 / Reversible reserve

Implementation layers

Permanent: ordinary walking / shade / accessibility / safety

Adaptive: replaceable signs / furniture / interfaces

Experimental: bounded test / bypass / human stop / removal

Public Space & Five Urban Sections

City first, AI backstage

Public Capability Interface | City First, AI Backstage

Orange devices are replaceable interfaces; shade, seating, staffed service, accessibility, bypasses and civic memory are long-term urban assets.

Five Urban Sections | AI Is Not the Main Character

Permanent city space + Adaptive interface + Experimental layer; exact dimensions are not statutory controls.

Mobility, Blue-Green & Landmark Memory

Railway DNA as tracks / switches / stations / mileposts

Mobility × Blue-Green × PCI | Continuity Is Not “Draw a Road”

Spatial principles

- North-south: public-life continuity backbone
- East-west: 5 evidence-gated stitch relations
- Blue-green: shade/thermal/stormwater first
- Nodes call capabilities; ordinary city works first
- Unverified crossings remain relationships, not invented structures

Landmark as Memory | 1909 → 2026 → Future → Retired

Landmarks record learning, including stopping and retirement. Railway DNA appears as tracks, switches, stations and mileposts - not nostalgic decoration.

Governance & Metrics

UAR / Responsible STOP / Public Stewardship

Urban Adaptation Rate | Learning Is Not Deployment Counting

UAR = verified improved eligible issues / evaluable qualified issues

Responsible STOP = learning/safety outcome, not automatic adaptation credit

Public Dashboard

UAR	Unknown
Null until real operation	
STOP rate	Unknown
Publish stops, not hide failures	
Override	Unknown
Human takeover must be measurable	
Transfer	Unknown
Revalidate before transfer credit	
Non-AI parity	Unknown
Usable when AI declined/offline	

Jing-Zhang City Version Release | Accountability, Not a Leaderboard

Illustrative structure only — no live operating counts are claimed.

Problem + baseline
Authorization + experiment record
Public-value outcomes
Complaints / override / incidents
Transfer + revalidation
Retirement + data disposition
Next-year unresolved problems
